

## Certificate of Immunization (COI)

**Objectives: At the completion of this section, the learner will know:**

- the purpose of the COI and how one is issued from ImmPRINT
- the recommended ways ImmPRINT users should use this immunization resource

Certificate of Immunizations (COIs) are required for patients under the age of 21 attending public or private schools. Valid and unexpired Alabama Department of Public Health (ADPH) COIs can only be accessed from ImmPRINT and are issued according to Alabama School Law Rules, <http://www.alabamapublichealth.gov/immunization/assets/SchoolImmLaw.pdf>. The COI only counts valid doses, and goes by the information that is available and present in ImmPRINT. When generating the COI, the registry assesses the student's age, grade-level, documented vaccines, and any current and existing exemptions to determine if the student is current on all school required vaccines. If the student is current according to the school law, then the registry will generate a valid COI. If the student is not current with school required immunizations, users will not be able to print a COI. The registry applies data in real-time; therefore, as soon as an immunization is documented and accepted in ImmPRINT, that information is applied instantly to the COI. Below is an example of an approved school COI. Notice the official ADPH seal transposed on the document and the ImmPRINT logo in the top left corner. The ImmPRINT logo may also appear in the bottom left corner if printed from a school.

COIs are to be used by ImmPRINT users, patients, and parents/guardians, as it verifies that students have met the minimal immunization requirements for school entry. Users can

view and print an official and unexpired ADPH COI for patients, and can provide them to the student and/or parent/guardian. For instructions on accessing a COI, please refer to Section 4, User Levels, of the manual. Once you identify your user level, review that section to gather more information about that role and responsibility, as well as the steps to accessing the COI.

MCV, MPSV,MENB									
Rotavirus									

**NOTES**

A licensed physician or qualified employee of the Alabama Dept of Public Health is responsible for the content of this certificate. All dates must include the month, day, and year. In cases of history of disease or laboratory confirmation, the month and year of infection or test must be filled in the appropriate box(es).

**The certificate is NOT valid without the name and birth date of the child, date of expiration, name and address of the physician or health department, and date of issue. A school or facility official is responsible for keeping a current valid Certificate on file for each child in attendance. When a child leaves or transfers to another facility, the Certificate of Immunization should be given to a parent/guardian.**
